

PARKS & TRAILS MATTER FOR HEALTH

A connected parks and trails system makes it easier for families to bike, walk and play outside. Having small accessible parks close to home and along trails means that people won't have to drive as far if they want to spend time outdoors.

I love the outdoors. I would love to be able to access safe, accessible walking, hiking, and biking trails that are separate from ATV or snow-mobile trails.

Sam, Bancroft

A connected parks and trails system creates more places to walk and bike safely, be a place to be active and meet new friends, and even build community gardens. All of these things are so important.

Fiona, Quinte West

A good trail network. Have trails and pathways beside creeks and through flood plains. Connect isolated parkettes and greenspaces in subdivisions.

Dawn, Stirling

My husband and I both enjoy the trails we now have. It is one of the best parts of living in Belleville.

Mary, Belleville

86% of residents support developing a plan to build parks, trails and natural areas so residents can have more active outdoor opportunities.
